

# Decking System

Outdoor decking was the very first application of nautilus natural fiber polymer composite because of its great physical performance and maintenance free. Multiple colors and surface treatments give decking more choice of combination. Tile is the simplest product for easily DIY.

**Tile**

Square WPC tile with multiple colors for various patterns is easily connected via the both sides interlock connectors.

**Decking**

Both co-extrusion and single extrusion decking are available. It is firmly installed with Nautilus foundation mechanism

**Installation**

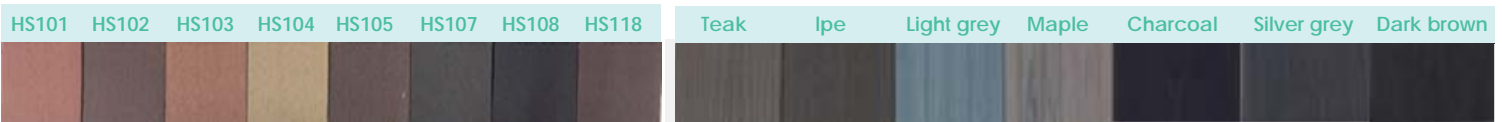

Nautilus decking foundation system tightly connect WPC slats together.
